Ideation Phase
Empathize & Discover

Date	1 MARCH 2026
Team ID	MBA-041
Project Name	Heart Disease Analysis using Tableau team formation
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map helps understand the needs, behaviors, and challenges of end users. For this project, the primary users include healthcare professionals, policymakers, and individuals concerned about heart health.

3.1 User Segment 1: Healthcare Professionals (Doctors & Medical Analysts) Think & Feel

- Concerned about rising heart disease cases
- Need accurate data to support diagnosis and prevention
- Want quick access to patient risk insights

See

- Increasing number of patients with lifestyle-related diseases
- Complex medical reports and large datasets

Say & Do

- Recommend lifestyle changes to patients
- Analyze patient history and clinical indicators

Pain Points

- Difficulty analyzing large datasets quickly
- Lack of visual tools for identifying patterns

Gains

- Quick identification of high-risk patients
- Better treatment planning and preventive care

3.2 User Segment 2: Government & Policymakers Think & Feel

- Need to reduce healthcare costs and disease burden
- Focused on preventive healthcare strategies

See

- Regional differences in disease prevalence
- Impact of lifestyle and socioeconomic factors

Say & Do

- Design public health programs
- Allocate resources for awareness campaigns **Pain Points**
- Lack of clear insights from raw health data

- Difficulty communicating findings to stakeholders

Gains

- Evidence-based policy decisions
- Clear visual reports for presentations

3.3 User Segment 3: Individuals & Patients Think & Feel

- Concerned about personal health risks
- Want easy-to-understand information

See

- Health reports with complex medical terms
- Lifestyle habits affecting their well-being

Say & Do

- Seek guidance on improving health
- Monitor personal health metrics

Pain Points

- Difficulty understanding medical data
- Lack of personalized insights

Gains

- Clear understanding of risk factors
- Motivation to adopt healthier habits
